CARE MANAGEMENT

Let us optimise your package to ensure you stay at home, happy, healthy and independent for as long as possible with the support of our care management.

This crucial role is managed by Care Advisors who are either registered nurses or allied health professionals, experts in ageing and local like you. We believe care management should be delivered within an integrated model and have a team of experts available to support you today and in the future, including a physiotherapist, dietitian, occupational therapist and podiatrist. Our care management team will work closely with you to identify your needs, adapting your services as you need, and educating you along the way. We like to think of it as a circle of support with you at the centre.

Our difference from other providers doesn't stop there. We also provide our consumers with access to telehealth, respite, day therapy centres and lifestyle and wellbeing programs, as well as the best of palliative, dementia and advanced clinical care.
